VOLUME I

NUMBER 4

OCTOBER 1973

The third issue of our Newsletter was delayed in order to include Oshkosh '73 news which in-turn caused it to be a double size issue. So, to help us return to our established schedule, this issue will be devoted primarily to a listing of previously unpublished Newsletter subscribers, and, a list of non-subscribing purchasers of the PL-4 Plans Set. First, however, we have some pertinent comments and notes.

In Newsletter Number 3 we asked everyone to help with an engine preference poll. So far only 12 persons have answered. We would appreciate you re-reading the request for engine preference data and sending a note to us ASAP.

At the PL-4 dinner in Oshkosh one PL-4 builder surprised everyone by saying he was nearing completion of his PL-4 project, to include having mounted a 65 H.P. Continental engine! Unfortunately, PAZ and your publisher cannot recall the name of that builder. We would appreciate hearing from you sir ASAP. It seems he said he was a farmer by regular profession.

We included a PL-4 pre-fab kit information sheet in Newsletter Number 3. Fellows it is imperative that we show some interest soon in those kits or the manufacturer will not go ahead with their preparation. Many of us need this type of kit service so please, if you have any plans to order one or more kits, do so ASAP! This is important!

Your publisher has been in contact with the Aircraft Spruce and Speciality Company of Fullerton, California and they do intend to stock and sell every item on the PL-4 consolidated materials listing except those items which PAZ himself intends to market. They have finalized their sources and prices and their listing should soon be available directly from them and/or will probably be advertised in the EAA magazine.

Future Metals Company of Miami, Florida has been doing a good business in PL-4 extrusions since we mentioned them in an earlier Newsletter. Their President thanks us for the business - they will be new supporters of the EAA by becoming advertisers in the Sport Aviation magazine. They have indicated they are also a good source for aluminum tubing.

We again want to put out a plea for pictures and stories from you builders that are well along with your projects. We think it would be helpful if someone (or more) could furnish the publisher with some good, high-contrast, black and white photographs of various parts, i.e., close-ups so others can really see in detail what the finished parts look like. Please help..?

Several subscribers have asked if anyone is renting rib form blocks; contact James L. Brown, 525 Bennington Terrace, Ridgewood, N.J. 02450. Rental of such blocks would only be practical if you have pre-cut and prepared rib blanks before obtaining the form blocks.

114
